COMPUTER SCIENCE & ENGINEERING

**CODING
CLUB**

CODING CLUB

Department of Computer Science & Engineering

• VISION

To produce globally competent and industry-ready graduates in Computer Science & Engineering by imparting quality education with the know-how of cutting-edge technology and holistic personality.

• MISSION

1. To offer high-quality education in Computer Science & Engineering in order to build core competence for the graduates by laying a solid foundation in Applied Mathematics and program framework with a focus on concept building.

2. The department promotes excellence in teaching, research, and collaborative activities to prepare graduates for a professional career or higher studies.

3. Creating an intellectual environment for developing logical skills and problem-solving strategies, thus developing and proficient computer engineers to compete in the current global scenario.

• PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO 1: Excel in professional career and higher education by acquiring knowledge of mathematical computing and engineering principles.

PEO 2: To provide an intellectual environment for analyzing and designing computing systems for technical needs.

PEO 3: Exhibit professionalism to adapt current trends using lifelong learning with legal and ethical responsibilities.

PEO 4: To produce responsible graduates with effective communication skills and multidisciplinary practices to serve society and preserve the environment.

PROGRAM OUTCOMES (POs)

Engineering Graduates will be able to satisfy these NBA graduate attributes:

1. **Engineering knowledge:** An ability to apply knowledge of computing, mathematics, science and engineering fundamentals appropriate to the discipline.
2. **Problem analysis:** An ability to analyze a problem, and identify and formulate the computing requirements appropriate to its solution.
3. **Design/development of solutions:** An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs with appropriate consideration for public health and safety, cultural, societal and environmental considerations.
4. **Conduct investigations of complex problems:** An ability to design and conduct experiments, as well as to analyze and interpret data.
5. **Modern tool usage:** An ability to use current techniques, skills, and modern tools necessary for computing practice.
6. **The engineer and society:** An ability to analyze the local and global impact of computing on individuals, organizations, and society.
7. **Environment and sustainability:** Knowledge of contemporary issues.
8. **Ethics:** An understanding of professional, ethical, legal, security and social issues and responsibilities.
9. **Individual and team work:** An ability to function effectively individually and on teams, including diverse and multidisciplinary, to accomplish a common goal.
10. **Communication:** An ability to communicate effectively with a range of audiences.
11. **Project management and finance:** An understanding of engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects.
12. **Life-long learning:** Recognition of the need for and an ability to engage in continuing professional development.

PROGRAM SPECIFIC OUTCOMES (PSOs)

1. **Professional Skills and Foundations of Software development:** Ability to analyze, design and develop applications by adopting the dynamic nature of Software developments
2. **Applications of Computing and Research Ability:** Ability to use knowledge in cutting edge technologies in identifying research gaps and to render solutions with innovative ideas

Computer Science & Engineering

Coding Club

About

"Everybody should learn to program a computer, because it teaches you how to think"
-Steve Jobs

In today's rapidly changing environment, programming skills are essential tools that can be utilized and incorporated into various fields and domains. Hence, it becomes absolutely essential to equip young minds with such skills. Coding Club aims to establish a coding culture on campus, reaching every student passionate about coding. The club's motto is to *Create-Build-Innovate*.

Beginnings

The club was started by a group of students from the departments of CSE who wanted to interact with like-minded peers and explore the world of computer science. They are driven by their passion for coding and hunger to learn, which has helped the club scale new heights.

Aim

- Conduct more coding competitions to reach every student on campus
- Organize an event during the annual techno hunt – Hackathon .
- Conduct workshops on areas of computer science like web development, application development, machine learning, IoT, etc.
- Contribute to open source projects, build websites and applications, and provide technical support to organizations and various clubs on campus
- Represent the college at inter-collegiate events
- Take part in competitions like SIH, Chhatra Vishwakarma award, Google-code runner and other online coding events.

Practices

- The club conducts a college wide coding competition every year to recruit the students who are passionate about coding. The competition not only focuses on coding but also on logical, analytical and problem solving skills
- The club meets every week to discuss and work on projects. All the members collaborate to achieve a common objective. Lecture sessions are also organized for the benefit of members, where some concepts of computer science are taught
- Workshop and technical talks on various competitions and concepts of computer science are conducted through the club. The club also organizes talks/sessions by seniors and alumni about internship and placement preparation

CMR Hackathon(March,2022)

CMR Hackathon was an intra-collegiate coding competition open to students of all branches and semesters. It was the club's first-ever event. The event saw wide participation from students across semesters and branches, with 83 team participants.

Weekly Sessions

To expand our knowledge of computer science, the club conducts weekly sessions on various topics of computer science. These sessions held so far have been on Time and space complexity, Numerical algorithms, Hashing, Dynamic programming, Competitive coding & problem-solving strategies, Cybersecurity, JavaScript, PHP & Databases, and a few problem-solving sessions.

Core Team

Mrs. Amita Mishra, Assistant Professor, Department of Computer Science & Engineering, CMREC.
Mr. Y. Mrutyunjaya, Assistant Professor, Department of Computer Science & Engineering, CMREC.

Syed Naveed Fazal, President
Apeksha Mankar, Vice President

Outcomes

- Coding Club helps members gain in-depth knowledge of coding. This helps them immensely during placements and can also bring laurels to the institution through various national and international programming contests
- The club helps members develop an aptitude for logical thinking and visualizing a problem from various perspectives and creating multiple innovative solutions
- The country as a whole requires a lot more coders for it to achieve the goal of a 'Digital India'. The club is doing its bit to help the country pursue this goal

COMPUTER SCIENCE & ENGINEERING Coding Club

list of the weekly scheduled program

Week	Description
1.	Time and Space complexity problems.
2.	Numerical algorithms
3.	Hashing
4.	Dynamic programming
5.	Competitive coding & problem-solving strategies
6.	Cyber Security
7.	JavaScript ,PHP& Databases
8.	Problem-Solving Sessions with HackerRank

5.	N. Srithani	208R1A0591	Srithani

PROBLEM:

Print a pattern of numbers from 1 to n as shown below.
Each of the numbers is separated by a single space.

```

1 1 1 1 1 1 1
1 2 3 3 3 3 3
1 2 2 2 2 3 4
1 2 2 2 2 3 4
1 2 2 2 2 3 4
1 2 2 2 2 3 4
1 2 2 2 2 3 4
1 2 2 2 2 3 4
1 2 2 2 2 3 4
1 2 2 2 2 3 4

```

SOLUTION:

```

#include <stdio.h>
int main ()
{
    int n;
    scanf ("%d", &n);
    int len = n*2 - 1;
    for (int i=0; i<len; i++) {
        for (int j=0; j<len; j++) {
            int min = i < j ? i : j;
            min = min < len - i ? min : len - i - 1;
            min = min < len - j - 1 ? min : len - j - 1;
            printf ("%d", n - min);
        }
        printf ("\n");
    }
    return 0;
}

```

PROBLEM:

To write a python program using if-else.

SOLUTION:

```
import math
import os
import random
import re
import sys

if __name__ == '__main__':
    n = int(raw_input().strip())
    if n % 2 != 0:
        print("weird")
    else:
        if (n % 2 == 0 and n <= 5):
```

```
        print("Not weird")
    elif (n % 2 == 0 and n <= 20):
        print("weird")
    elif (n % 2 == 0):
        print("Not weird")

Sample input:
24
Sample output:
Not weird.
```

PROBLEM:

Calculating Gain percentage

Vikram buys an old scooter for Rs A and spends Rs B on its repair. If he sells the scooter for Rs C that is his gain %.

SOLUTION:

you are using python

```

cost = int(input())
repair = int(input())
sell = int(input())
costprice = cost + repair
profit = sell - costprice
profitPP = profit / costprice * 100
profitPP = "{:.2f}".format(profitPP)
print(profitPP)

```
